

PRESS RELEASE**SACYR ENGINEERING AND INFRASTRUCTURES SUBSCRIBED
A €4.1 BILLION ORDER INTAKE IN 2021**

- **48% of this order intake comes from Sacyr's P3s, which are subject to meticulous cost analysis and risk control.**

Madrid, January 24, 2022.- Sacyr Engineering and Infrastructures increased its ratio of project awards in 2021, reaching an order intake **worth €4.1 billion, as per the roadmap set out in the 2021-2025 Strategic Plan.** The order intake in 2020 was slightly greater than €2 billion.

Of the contracts awarded last fiscal year, **€3.3 billion come from contracts awarded and signed in 2021.** Some relevant examples are the second runway at Jorge Chavez airport in Lima, Peru; energy efficiency improvements at the University of Idaho P3, USA; the expansion of the 12 de Octubre Hospital in Madrid, Spain; or the enlargement of the RSC-287 highway in Brazil.

Additionally, the Engineering and Infrastructures division won three highway contracts in Texas and Florida, USA; two contracts for Amazon; several high-speed rail sections for Adif in Spain; and the construction of the new Buin Paine Hospital in Chile.

Moreover, Sacyr's construction subsidiary has other **contracts awarded in 2021 but are pending signature in the coming weeks, valued at €811 million.** These include the Ruta 78 Santiago-San Antonio, in Chile.

P3 business area

48% of Sacyr's contract awards in 2021 were projects with recurring income and located in stable markets **from Sacyr Concesiones, Sacyr's P3 business division.** The remaining 52% came from direct award contracts. The projects have undergone a

meticulous cost analysis before formalizing the contracts, paired with thorough control risk and a rigorous management process during its execution.

Some hallmarks of Sacyr Engineering and Infrastructures in the 2021-2025 Strategic Plan are the care to ensure the successful construction of the projects, the balance of rights and obligations between the parties, compliance with deadlines, and quality execution.

High-value assets

Within the framework of this strategy, some feats are worth noting, such as the award of large-scale P3s in the USA, Italy, Chile, and Brazil, which have generated high-value assets for the group; the increase in the volume of contracts in Spain, both in construction and civil works; and the consolidation in markets with new strategic projects, like Peru, Canada, and Portugal.
